

# Customized Payment Solutions

Metrics Global offers a comprehensive array of payment solutions for businesses of all sizes – regardless of industry, geographic location or business model. Our solutions support both in-person and card not present/MOTO (mail order, telephone, or eCommerce) sales as well as mobile payment and international payment processing. We process over \$3 billion in annual sales for clients and have earned a 99% client retention rate.

If you are switching from another processor, as part of our strategic consulting, Metrics Global can review the pricing received by card category mix and often save clients hundreds if not thousands of dollars per month in processing fees. We also provide our clients wholesale pricing for equipment purchases so they can reduce expenses and avoid costly leases. By delivering an immediate and significant impact on profitability, Metrics Global helps businesses grow faster.

## Global Payment Processing

Metrics Global processes in over 135 currencies so our clients can accept all major USA and international credit cards. We currently have clients conducting business in over 60 countries.

### Multi-Currency Processing (MCP)

MCP enables merchants who operate outside of the USA to sell products and services in the customer's home currency, while receiving funds in their local currency.

### Cross-Currency Processing (CCP)

CCP allows US-based merchants to offer customers the option of paying for purchases in their own currency or in US dollars.

## Cash Advances

Metrics Cash Advance offers a viable, hassle-free alternative to bank loans. With \$10,000 to \$1MM available to approved businesses in as few as 3 days, you'll have the capital you need to maintain and grow your business.

## Mobile Payment Processing

Metrics Global offers 2 options for mobile payment processing, which increases convenience for field operatives and customers alike:

### iProcess™ Mobile Payments

iProcess uses a small, encrypted card reader which attaches to the audio jack on a mobile phone or tablet to securely and reliably process keyed or card swipe payments.

### Compact Wireless Terminals

These small, but rugged terminals combine the convenience of mobile payment processing with the familiarity of a traditional keypad and paper receipt for customer signature.

## Non-Commissioned Representatives

Because no Metrics employee receives financial incentives for selling our products and services, you can be sure that the guidance you receive is determined only by your needs and what's best for your business.

# Global Payment Gateway

With the Metrics Global Gateway, merchants can accept all major credit cards for the USA and abroad, as well as debit cards and electronic checks. With this truly global gateway, merchants have the freedom to conduct transactions in multiple currencies worldwide, and the flexibility to manage multiple business accounts within a single gateway account. The Metrics gateway is also certified to all USA and most international platforms, so it can be used with nearly any processor.

The Metrics Global Gateway has several features to help corporations streamline operations and reduce administrative time and costs.

## iSpyFraud™

iSpyFraud is an advanced fraud management tool that allows businesses to proactively reduce chargebacks by eliminating most fraud in real time. Through the use of multiple filters and instant reporting systems, you can achieve maximum protection for your business.

## Tokenization

Our advanced data vault uses tokenization to preclude storage of financial data on your servers and prevent employee access to raw customer data. This supplies added identity theft protection and greater customer confidence while allowing the convenience of secure access to card data for rebilling.

## Automated PCI Certification

With the automated PCI certification feature, businesses can not only complete certification within the gateway, but also download a website validation seal for customer assurance.

## Instant International Access

Because the Metrics Global Gateway is preconfigured to accept international credit and debit cards and allows transactions in multiple currencies, our clients have the ability to quickly capture business overseas whenever the opportunity presents itself.

## Contact us today to discuss starting or switching your payment processing services

As worldwide leaders in providing innovative, transparent payment solutions, Metrics Global offers competitive rates, an exceptional level of service and intensive attention to client needs. Our focus on building trust and fostering long-term client relationships has made us the world's premier partner for merchant services.
